

Here's what others are saying about Kids Enabled magazine!

As a parent and a professional, KIDS Enabled magazine is an invaluable resource. This magazine promotes innovative ideas and provides comprehensive information, which can easily be put into practice on a daily basis. KIDS Enabled effectively supports the theory that knowledge is power as demonstrated among the selection and content of topics, thereby increasing the likelihood for success with these children. I highly recommend KIDS Enabled magazine as a staple for every family or professional associated with a child having special needs.

I received a copy of your magazine, and sent it home with one of my parents to get her opinion on whether or not she thought other parents would like it. Well, I never received my copy back because she loved it so much! Would it be possible for you to send me 10 more copies of the magazines so that I can distribute them to the other parents? Thank you so much for this great source of information!

I was so happy to receive the last free issues from you that you can imagine my surprise when I received this free issue! I LOVE THIS MAGAZINE!!! It is so informative! I have distributed it to my faculty/staff here at Sequoyah. I also took the resource section to our county's Interagency Council for them to have in their portfolios to direct parents to. I have used this resource abundantly. All I can say is a hearty Thank You!!! I can't tell you how much it has helped the children of Cherokee County! There is a wealth of information in every issue that pertains to prek-12th grade! Very impressive! Keep them coming! We are using them!!
